

INTER-SILO CROP AGITATOR DESIGNED FOR FLAT STORAGES

Inter-Silo grain agitator is a mobile machine invented and produced in Denmark and used to stir grain/seeds in flat storage to facilitate airing and drying

KEY POINTS:

- Makes crop homogenous, easier and faster to dry
- Reduces drying time, improves germinating capacity
- The homogenous crop ensures better moisture results
- Eliminates wet spots
- Allows to stack the crops higher without affecting quality
- Handy machine easily installed and moved around
- Affordable and will earn the revenue within the first season
- Only one person is needed to operate

OPERATION:

- Bury the agitator in the grain and use the start button on the handle
- Work the agitator through the grain/seeds while its weight rests on the top panel
- ! Keep the power cable out of the way, never touch the running warm component, always burry warm in the grain

COMPONENTS:

- Body for grain agitator with handle and side extensions
- Worm units 80/ 180/ 250 cm with gear motors 230 / 380 V

Grain agitator with 80 cm worm unit 1,1 kW motor

Grain agitator with 180 cm worm unit 2,2 kW motor

2,400 EUR + VAT

Grain agitator with 250 cm worm unit 4 kW motor

2,700 EUR + VAT
